Opening the Front Door

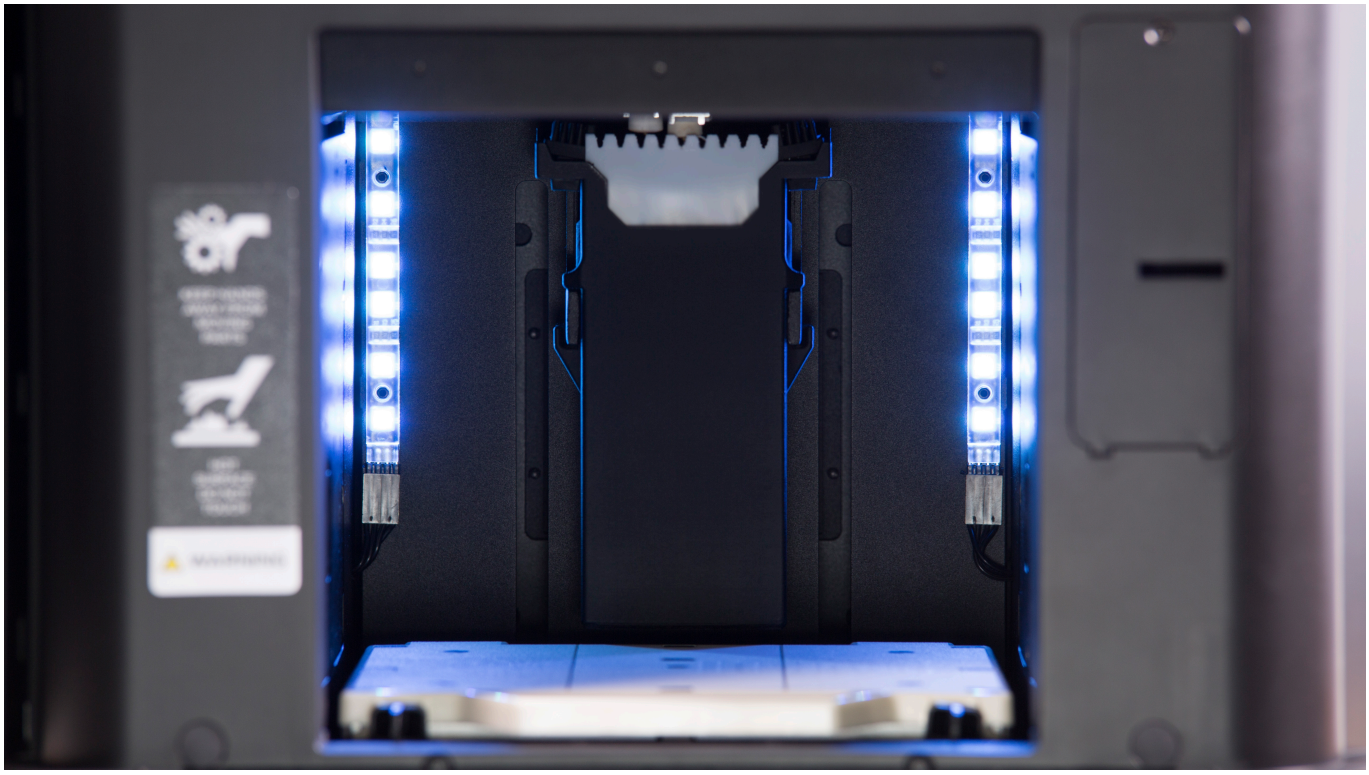
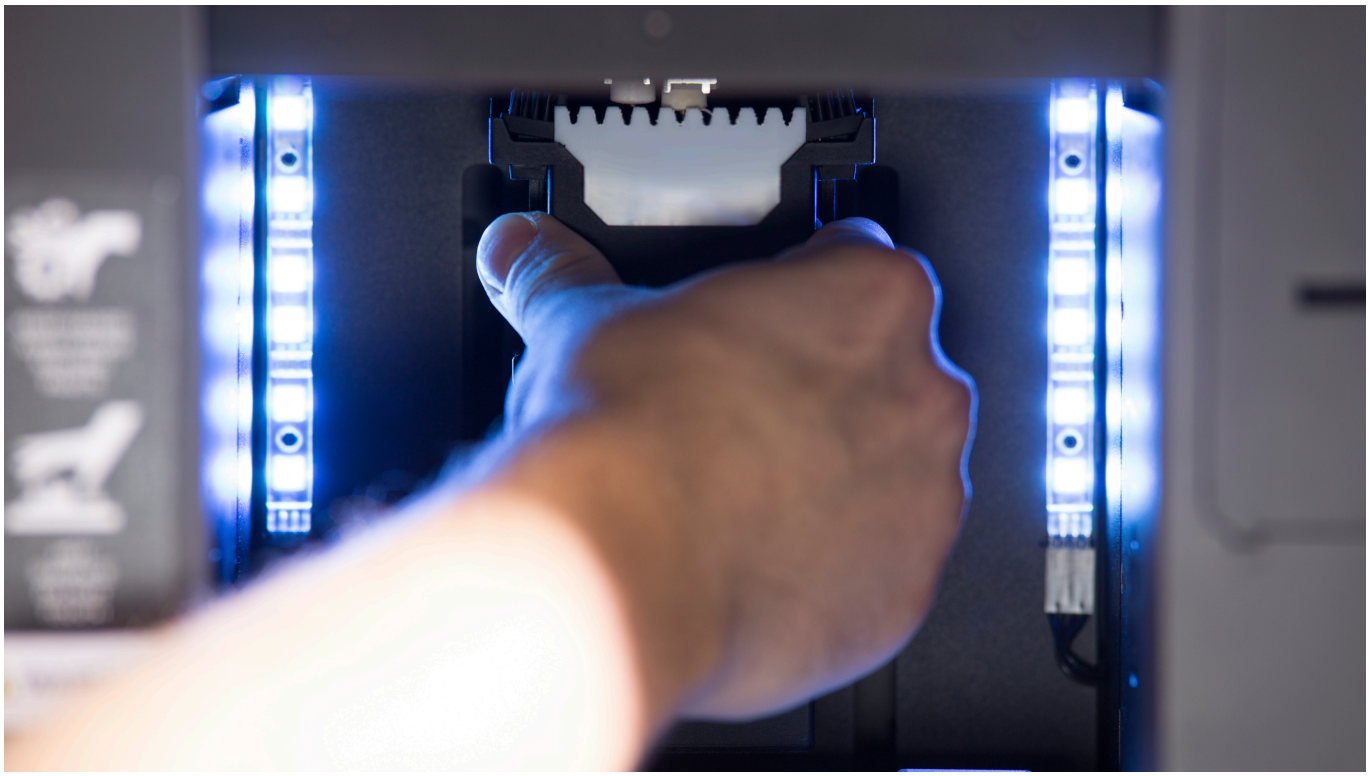
Open the front door.

Before removing the waste container, make sure that the build tray is moved all the way down. In order to do this, from the printer's menu choose Maintenance->Move the platform. Hold the "down button" until the tray reaches the bottom of the printer.

Waste Container Removal

Remove the waste container by pressing on the handles on both sides and pulling it towards you.





KEEP HANDS AWAY FROM MOVING PARTS
HOT SURFACE DO NOT TOUCH
WARNING

PTFE Brush Removal

Remove the PTFE brush.

PTFE Brush Installation

Place the new PTFE brush in its place.

Silicone Brushes Removal

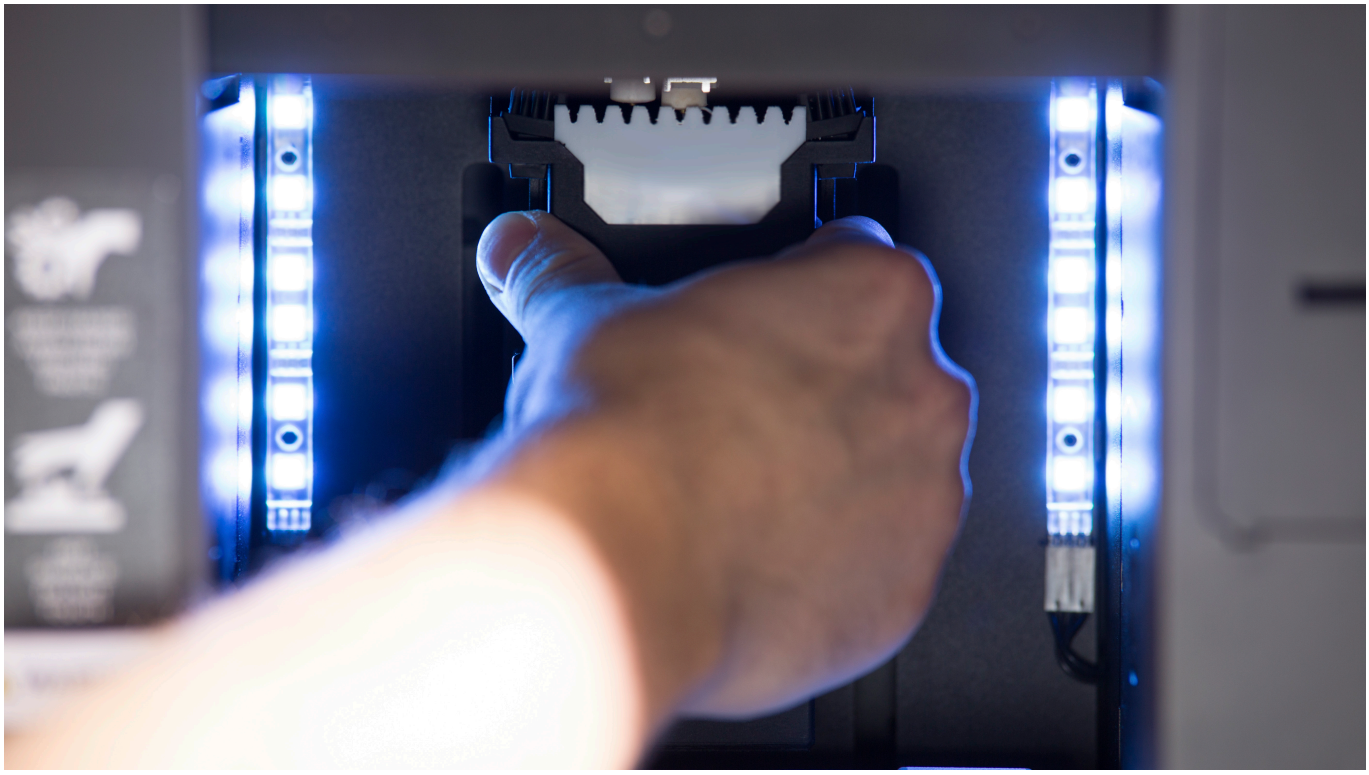
Remove the silicone brushes.

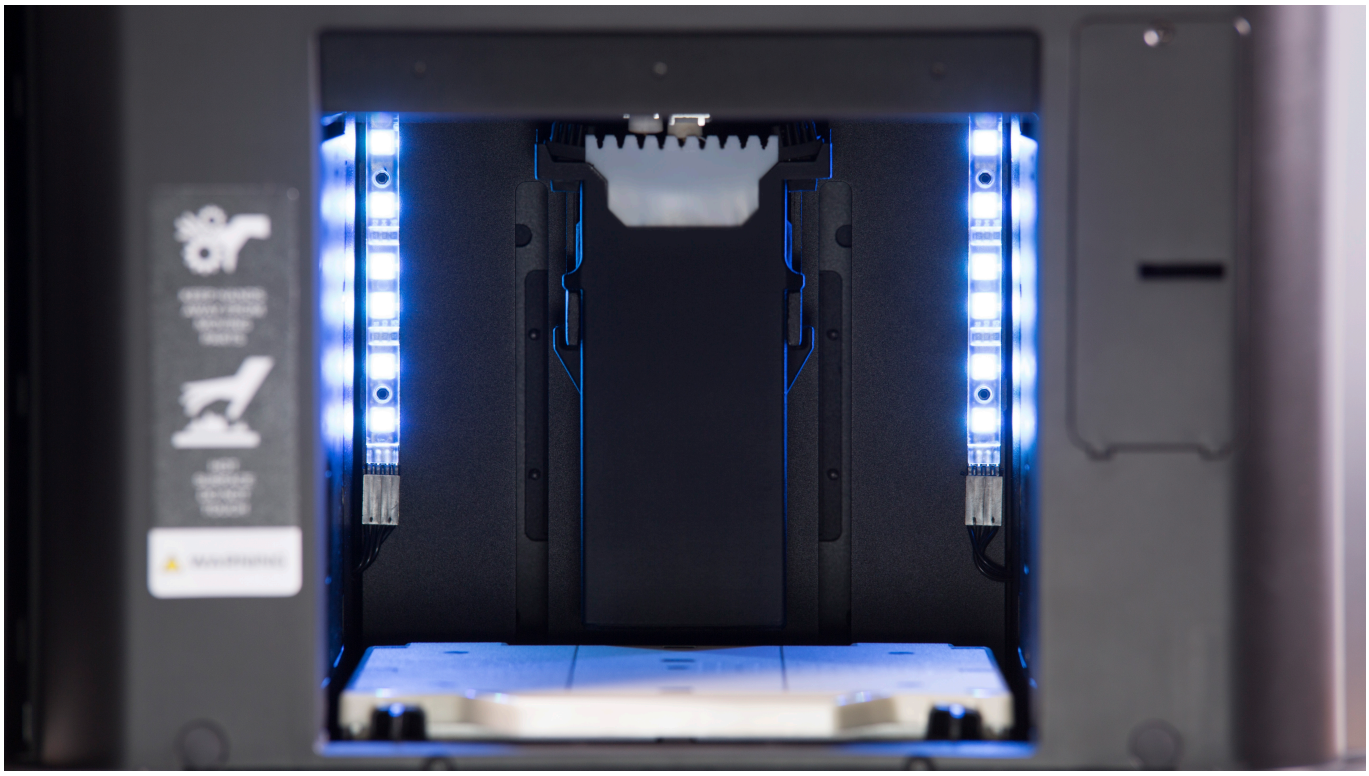
Silicone Brushes Installation

Place the new brushes in their place.

Waste Container Installation

Set the waste container in its place and push it until it clicks.





Closing the Front Door

Close the front door.
