Unloading the Model Material

From the menu choose “Material,” then “Model,” and “Unload the model material.” Follow the instructions provided on the display.

Open the left door by pressing the release buttons, turn the lock to OPEN, and remove the cartridge from the printer.

Unloading the Support Material

From the menu choose “Material,” then “Support,” and “Unload the support material.” Follow the instructions provided on the display.

Open the right door by pressing the release buttons, turn the lock to OPEN, and remove the cartridge from the printer.

Unplugging the Power Cable

Turn the printer off and unplug the power cable.

Securing the Extruder

Secure the extruder with the plastic foams.

Wrapping the Printer

Wrap the printer in security foil.

Putting the Printer in the Box

Place the cushioning at the bottom of the box. Use the handles to put the printer inside the box.

Placing the Top Cushioning

Place the top cushioning on the printer.

Packing the Printer

Pack the printer using the provided box.

Taping the Box

Tape the box.
